

AirPlus Mobile A.I.D.A. The AirPlus app for virtual credit cards.

AIRPLUS. WHAT TRAVEL PAYMENT IS ALL ABOUT.

AirPlus promotes innovative payment solutions

Mobile payment systems have many advantages over classic methods and are an increasingly part of daily life. Because the mobile phone is a constant companion that one can hardly imagine being without, AirPlus promotes innovative mobile payment technology and has developed a future-oriented solution that expands the possibilities of the AirPlus Company Account: Mobile A.I.D.A.

Business travel with AirPlus' mobile payment app

Developed by AirPlus, Mobile A.I.D.A. is an app that allows travelers to generate MasterCard numbers at any time. The app displays a virtual MasterCard with the number and card verification code on the smartphone. This enables travelers to book travel services that are settled centrally through the AirPlus Company Account.

Mobile A.I.D.A. in the app store

The innovative AirPlus app can be downloaded free of charge from the Apple App Store or from the Google Play Store.

Mobile A.I.D.A. is currently available for iPhone versions iOS 4.3 or newer but also for Android 4.0 or newer. The app is optimized for smartphones, but can also be used on the iPad.

Fast, simple and flexible payments on the road

Payment by mobile phone has concrete advantages for business travelers. Whenever they use Mobile A.I.D.A., the Company Account is billed directly, eliminating the need for cumbersome travel expense reports because all credit card transactions are allocated to the associated AirPlus Company Account.

Mobile A.I.D.A. is particularly flexible. Airline tickets, hotel accommodations, train tickets, events and many other travel services can be paid for with the AirPlus app – both before and during the trip.

Minimal booking effort for companies

Mobile A.I.D.A. also holds attractive advantages for travel managers:

- > Perfect cost transparency: companies settle all transactions centrally through the respective AirPlus Company Account.
- > Less administrative workload: bookings are made directly by travelers.
- > Optimized lodged cards: the AirPlus app uses MasterCard's worldwide network and, thus, complements current AirPlus Company Account acceptance.
- > Simple management: app usage can be authorized and managed in the AirPlus Business Travel Portal.
- > Controlled usage: virtual credit cards can only be used for services related to travel and events.

Always there in emergencies

The AirPlus app can also be helpful in an emergency. If cash or credit cards are stolen on a business trip, staff members' travels can still be continued thanks to rapid assistance through the app – virtual credit cards can be generated at any time to help travelers settle their bills. Mobile A.I.D.A. thus offers security in the event of unforeseen expenditures – around the clock, virtually anywhere in the world.

Security has top priority

When developing Mobile A.I.D.A., AirPlus placed the highest priority on the security of mobile payment transactions:

- > Mobile A.I.D.A. can only be used by personnel, who have been authorized to use the app by the company.
- > Mobile A.I.D.A. is password protected and highly encrypted.
- > Virtual credit cards can only be used for travel services and events. Earmarking it for such a limited range of services makes theft rather uninteresting.
- > Credit card numbers are made for one-time use, which additionally reduces the risk.
- > Virtual credit cards can always be deleted or disabled.

Banknotes in a wallet can only dream of being this secure!
