

# AirPlus International.

Centralized virtual payment,  
seamlessly integrated with  
Concur products.

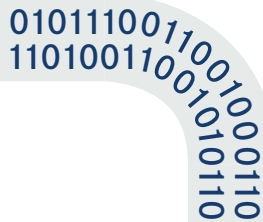

The AirPlus card number is lodged within the Concur booking tool, invisible to the traveler, to pay for travel related expenses.

This enables bookings for non-employees, groups and infrequent travellers to be made via the Concur booking tool.

Our enhanced data capture allows up to 9 additional fields to be transferred to AirPlus from Concur profiles or added at the time of booking.

The AirPlus payment method works both when booking with Concur directly and when going through a TMC.

Our unique ability to combine the booking data from Concur with the merchant data at a transactional level, allows the seamless automatic feed from AirPlus into Concur Expense and Finance.

This daily transmission reduces the need for manual allocation of expenses.

**Standard Features**

AirPlus travel payment solutions provides a secure method of payment with the lowest levels of fraud in the industry. Our service have flexible billing cycles, including weekly, bi-weekly or monthly options. AirPlus statements are tailored to best suit your operation's needs and have the ability to integrate with any booking tool or financial system.
